

HHOG 11 "EPD" v2

Explosive Pressure Dissipater

See the Internal Diagram: <http://www.hhoglabs.com/images/HHOG2EPDa.jpg>

See the Test Videos: <http://www.youtube.com/watch?v=0YlhZyUPxLo>.

This little gem will dissipate any flashback that hits the device it is attached to. It acts as a pressure relief valve that **AUTOMATICALLY RESETS ITSELF** after a flashback so you can keep pumping Hydroxy, uninterrupted!

FEATURES:

- * Full color instructions: <http://www.hhoglabs.com/images/EPDInst.pdf>
- * Fully **USER SERVICEABLE** parts! Each internal/external part is replaceable!
 - * Unique Auto-Resetting internal "Blast Relief".
- * Attaches directly to your Hydroxy generator or bubbler for point of contact protection.
- * 3/4 threaded version fits many Water Filter Casing designs which can be used for reservoirs, bubblers or Hydroxy cells.
 - * We're so confident in this item, that we offer a Full 30 Day Guarantee.
 - * Opens between 10 – 15 PSI, so it works great to limit your backpressure!

Shipping Weight:
9 oz each
